

# THICK – ROBUST – TEXTURED

Alliance proudly introduces our newest fixture family constructed of sand cast bronze, for applications where a heavier, thicker appearance is desired.

Engineered with our uncompromising commitment to quality and longevity, this new series boasts high-grade materials, rugged durability and hand-crafted details.

The extra-thick, heavy-duty construction stands up to extraordinary abuse, making it ideal for high traffic areas.

## **HSC-PL1**

Area & Path Light

- 22" height, 7" diameter
- Uses G4 bi-pin LED lamp
- 25' wire lead
- Frosted lens provided
- Sand-cast bronze ground stake

### **FACTS About Sand-Cast Bronze**

Sand-casting bronze is a time-sensitive process requiring skilled artisans. Components are produced in small batches and hand-finished before being assembled into complete fixtures. Sand-cast bronze ages naturally, for a fixture that blends well in outdoor environments.

All HSC fixtures include sand-cast bronze ground stake.
