

## DOUBLE WIRE LEAD

We take pride in offering top-of-the-line outdoor lighting solutions that are designed to enhance your outdoor space. **Our industry-first double wire lead system has set us apart by making installation easier and faster.**

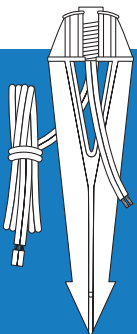

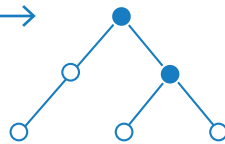

**Dramatically reduces installation time**

### How it Works:

**Quickly make connections** by daisy chaining the 18" wire lead from one fixture to the 25' wire lead on the next fixture. The wire provided on the fixture is **16-2** and can handle up to **96 watts** allowing you to connect multiple fixtures with ease along one **continuous wire run**.

With the double wire lead, a fixture can be a connection point for multiple fixtures.

Alliance advantages make your life easier and your project more profitable

### TWO WIRES ARE BETTER

Allows you to daisy chain fixtures or use a fixture as a connection point for multiple fixtures

### Other Alliance Advantages:

**Slotted stakes:** Make easy work of changing out a broken stake or swapping out a fixture. No need to thread a bunch of wire, just slip it right through the slot.

**Pre-connected wire leads:** All Alliance fixtures have wire preconnected and come ready to install.

**Adjustment features:** Dial in the precise look with our simple adjustment features that don't require any tools. Compression fit systems allow you to place hats on stems with a simple push. Thumbscrews allow you to adjust angles and light output without the use of a screwdriver.

**Alliance fixture features simplify the installation process, saving you time and effort while ensuring a seamless and professional result.**
