Wi Fi
Bluetooth®

Take control of your outdoor lighting from the palm of your hand with the app-controlled it2 Smart Transformer and iTimerPRO-2 Astronomical Timer from Alliance Outdoor Lighting. Designed for convenience and flexibility, these smart solutions make managing your setup easier than ever.

The it2 Smart Transformer

features zoning for up to three zones, a large wiring compartment, angled terminal lugs, multiple knockouts, and a manual on/off button. Control it with Bluetooth or Wi-Fi, schedule lights with the tap of a button using the pre-loaded dusk to dawn or dusk to midnight programs, or set custom programs for each zone.

Available in 150 or 300 watt
it2-150 | it2-300

The iTimerPRO-2

upgrades traditional transformers with smart controls, including on/off scheduling and an astronomical timer. It's a simple plug-and-play device for upgrading transformers, or any device up to 15 amps.

Control both devices through the itPRO app.
Manage zones for the it2, adjust schedules for both products, and bring modern functionality to your lighting system —whether you're upgrading an old transformer or installing a new smart one.
