

The background image shows a nighttime scene of a swimming pool with blue underwater lighting. The pool is surrounded by a stone deck and a covered patio area with warm-toned outdoor lighting. In the upper left, the Alliance Outdoor Lighting logo is displayed. A large white arrow points from the bottom right towards the top right, indicating the direction of the lighting installation process.

ALLIANCE
OUTDOOR LIGHTING

ADD LIGHTING TO YOUR POOL INSTALL

Why install lights at your pool?

You're already trenching for wiring — drop in low-voltage runs at the same time.

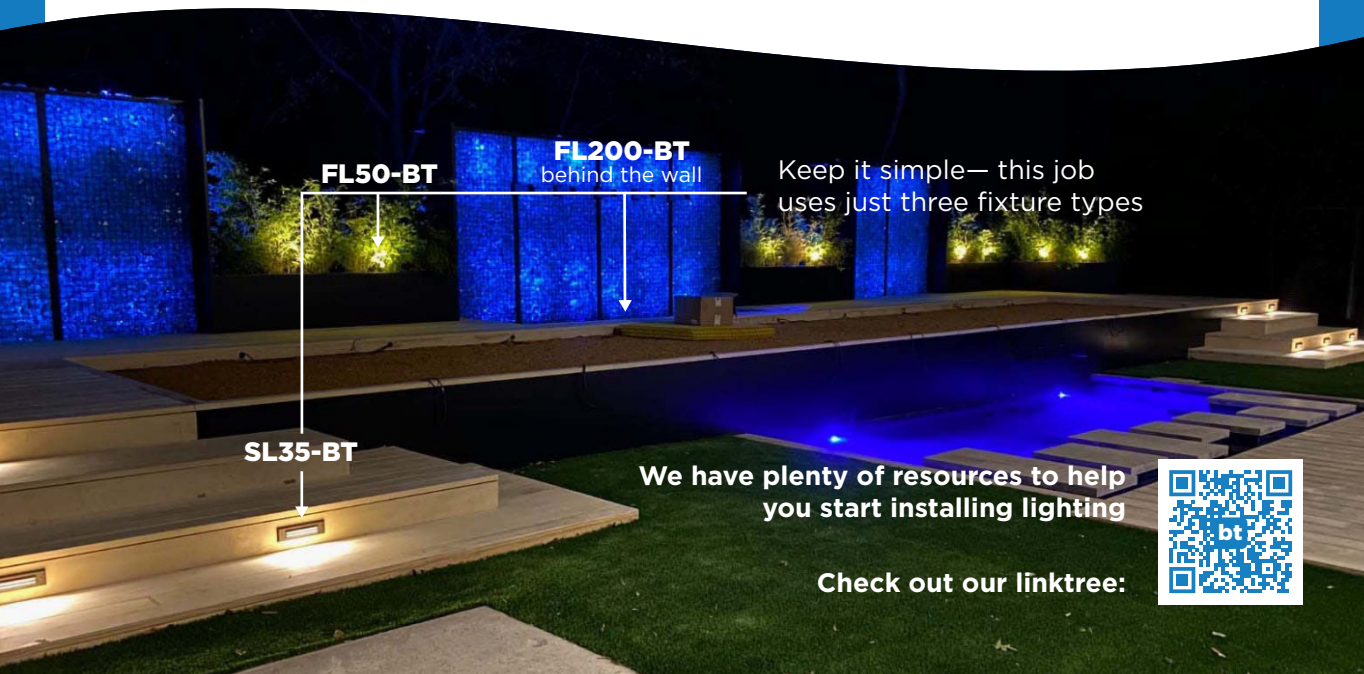

Lighting sells itself around pools: safety on steps, security around the water, and professional finish.

Alliance fixtures cut down on callbacks. No corrosion. No cheap parts failing.

Set the mood with color changing lights

It's more profit for you, more wow-factor for your customer. And with the **Alliance bt system**, you can even hand them wireless control to change colors, set zones, and create that **“party moment.”**
